Mobile Software Engineer with four years of commercial experience, building cross-platform apps with React Native and Expo. Currently at GMI software, where I also author open-source native modules built on Nitro Modules.

EXPERIENCE

Mobile Software Engineer · GMI software Remote — Jun 2026 – Present

- Building cross-platform mobile applications with React Native and the New Architecture
- Authoring and maintaining open-source native modules built on Nitro Modules
- Working across the native layer in Swift, Kotlin, and C++ to improve rendering performance
- **react-native-better-maps**: High-performance maps for React Native built on Nitro Modules and the New Architecture, backed by MapKit on iOS and Google Maps on Android.
- **react-native-better-clustering**: A faster drop-in replacement for react-native-map-clustering with the same MapView API and a C++ supercluster engine underneath.
- **react-native-better-pdf**: A native, virtualized PDF viewer for React Native built on Nitro Views, using PDFKit on iOS and the platform PdfRenderer on Android.
- **react-native-pay**: Apple Pay and Google Pay for React Native behind one type-safe API, built on Nitro Modules.
